---

Mr. Rankin.

I am contacting you in regards to proposed power line corridors in the area of land in the Hatchet Ranch subdivision in the Colorado City area in Colorado. This is part of the San Luis Valley/Calumet/Comanchi Transmission Project.

**I-292-001**

I agree with the opinion of other homeowners in my area that utilizing the existing corridor used by the D&Rg Western R.R. between the Hatchet Ranch and the Cedarwood Station Subdivisions to be the most sensible choice. This corridor would impact the fewest number of residences and already has access for both build and service of the transmission lines proposed. This corridor is already occupied by the railroad and keeping these types of services clustered would make the most sense to me.

I thank you for your time.

Eric Denissen

### **I-292-001: Route Refinement > Calumet-Comanche (In Review)**

Your email/letter/comment form has been received and your comment noted. Route refinement for the proposed project and mitigation measures will be addressed in the Environmental Impact Statement.

The Environmental Impact Statement is anticipated to be completed in late 2010 and will be available at

<http://www.usda.gov/rus/water/ees/ea.htm>.
